Evidence of Evolution Notes

p. 177-179 Cells and Heredity

| JE (Reorder) | Evidence that supports evolution includes: |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | 1)Fossils |
| | The fossil record provides clues about how and when new species evolved and how organisms are |
| | 2) Similarities in Development |
| | 3) Similarities in |
| | Similar structures that related species have inherited from a common ancestor are known as |
| | 4) Similarities in and Structure |
| | Similar body structures are due to common |
| JESTIONS eflecting) | Radius Ulna Rulius Human Cat Whale Bat |
| JMMARY(Review): | |
| | |
| | |
| JESTIONS eflecting) | Similar structures that related species have inherited from a common ancestor are known as 4) Similarities in and Structure Similar body structures are due to common |
